

Project Design Phase
Proposed Solution Template

Date	28 September 2026
Team ID	6ab221341
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	In ServiceNow, manually controlling form fields can lead to incorrect data entry and poor user experience. There is a need to automatically control field behavior based on specific conditions.
2.	Idea / Solution description	Implement Client Scripts and UI Policies in ServiceNow to dynamically control form fields. Client Scripts will be used for client-side validation and automation, while UI Policies will be used to make fields mandatory, visible, or read-only based on conditions.
3.	Novelty / Uniqueness	The solution provides dynamic and automated form behavior without requiring users to manually configure fields. It improves accuracy and provides a simple, user-friendly ServiceNow interface.
4.	Social Impact / Customer Satisfaction	Reduces data-entry errors, saves time, and improves the user experience. Users can easily understand which fields are required and what information needs to be entered.
5.	Business Model (Revenue Model)	Organizations can reduce operational effort and support costs by automating form validation and field behavior. The solution can be implemented as part of ServiceNow customization and consulting services.
6.	Scalability of the Solution	The solution can be extended to different ServiceNow tables and applications. Additional Client Scripts and UI Policies can be added as business requirements grow, making it suitable for small and large organizations.
